

# SUPPLIES

## Mr. Young's Seventh/Eighth Grades

**Three single-subject notebooks**, preferably college-ruled. For math, social studies and science. If your writing dictates larger lines, that's fine. Loose-leaf binders are discouraged as they take up so much space.

**Pens** are *required* for social studies. Any dark color will do, as long as it doesn't bleed through the page.

**Pencils** are *required* for math - erasable ink is NOT acceptable.

**Graph paper?** Unless we are graphing, graph paper will *not* be necessary, and if we need it, I'll supply it. But if you like to do daily math assignments on graph paper please be sure to bring a large supply.

**Two book covers.** All books must be covered; paper bags make perfectly good, long lasting book covers.

**Calculator.** A simple, basic calculator will do for most tasks. More sophisticated scientific calculators are useful at times, but if you are prone to losing your calculator, replacing scientific ones can get expensive. (Graphing calculators are also fine, but will not be necessary until high school.) Please put your name on your calculator in large letters.

**USB memory stick.** This way you won't have to email assignments between home and school, which is discouraged.

**NOTE TO EIGHTH GRADERS:** *Be sure to see Ms. Dharmar's supply list as well!*
