

SCIENCE CLUB WITH MS. ROSE!

Session #5

We made it through the rainy winter, and now it's time welcome spring! This session of Science Club we will explore seasonally connected projects, including celebrating the return of the sun by making a solar powered car, experimenting with natural plant dyes, and growing our own mushrooms!

Science Club with Ms. Rose is an exciting afterschool STEM program; (Science, Technology, Engineering, and Math) a chance to learn about science, have fun with your friends, and make projects to bring home, or give as gifts to your friends and family.

Purpose:

To provide students with an after school academic opportunity that presents science concepts in a fun, hands-on way. We will be integrating science, technology, engineering, art, and math with literature, and creativity.

Goals:

- Deepen observation skills through all five senses
- Integrate science inquiry into students' lives beyond the classroom
- Develop students' relationship with the natural world, and inspire them to explore their surroundings more closely
- Create projects that students can take home and share with others

Details:

Science Club sessions consist of thematic units held after school from 3:15 pm to 4:30 pm. Students will join Extended Day on the playground from dismissal until 3:15pm. Snack is provided.

Our upcoming 5-week session schedule is listed below. Please note there will be no Science Club during our Spring Break.

Session #5

Tuesdays 3:15-4:30pm

Mar. 12th, 19th, 26th, Apr. 2nd, 16th
